## SUMMARY

Accomplished Senior Software Engineer with extensive experience in developing and implementing software solutions to enhance system functionality and user satisfaction. Proven track record in optimising software applications for performance and scalability, ensuring compatibility with evolving technologies. Expertise in application development, database management, and API integration, with proficiency in C#, MVC, SQL, ASP.NET, JavaScript, and RDLC Reports. Demonstrated ability to lead design/build efforts for integration services and web services, contributing to high-quality standards through code reviews and standardised testing procedures. Career goal: to leverage technical skills and leadership experience to drive innovative software solutions that meet client needs.

## SKILLS

- Programming Languages (C#, ASP.NET, MVC5, Basic .NET CORE)
- Database Management (SQL, Oracle Client)
- Serverside Frameworks (MVC , .NET 4.0 / 4.5)
- RESTful APIs
- Version Control (Git, TFS)
- Debugging and Troubleshooting
- Design Pattern (ONION, Repository, Singleton)
- Reporting Tools (RDLC, Crystal Report)
- Environment ID (VS 2022 / 2019 / 2017)
- Client Side Script (JavaScript / jQuery)
- ORM Tool (Entity Framework)

## EXPERIENCE

### Senior Software Developer

**MRR Software** *Mar 2024 - Present*

- Worked closely with other team members to identify and remove software bugs.
- Developed and implemented software solutions to meet client requirements, enhancing system functionality and user satisfaction.
- Optimized existing software applications for improved performance and scalability, ensuring compatibility with evolving technologies.
- Developed standard procedures for testing and validating software.
- Troubleshoot and debug issues within applications, ensuring they are resolved in a timely manner
- Participate in agile development practices, including sprint planning, daily standups, and retrospectives.
- Stay uptodate on industry best practices and technologies to continually improve development processes

### Senior Software Developer

**Capgemini Tech India Services** *Mar 2022 - Jan 2024*

- Provided application development:
- Responsible for Creating refund Batches

- The Royal Trust Pension Refund System software is designed to simplify the process of managing refund payments out of Pension Funds
- Handling database on Oracle Data Client
- Worked on Server-Side Validations As per Client Requirement
- Worked on Crystal Report Funding Report for PRS

### **Software Developer**

**Cyber-Tech System and Software Ltd.** *Aug 2021 - Mar 2022*

- Provided application development:
- Developed RDLC reports
- As and when required work also on front end technology using dojo framework of JavaScript
- Handling database on SQL Server
- Handling Production issues and modifying the code according to the requirement
- Worked on MapIt API as per API Request Generate Reports for Various Projects

### **Software Developer**

**GIF Technologies Pvt Ltd** *Dec 2020 - Jul 2021*

- Provided application development, solution for GIIS Team:
- Provides solution architecture and development for GIIS development teams implementing advanced integration, database systems to ensure team adherence to GIIS and client technical design and development standards and to advise/assist with technical implementation efforts
- Promoted to Developer based on technical and client communication performance
- Designed and created the database for the application
- Developed HTML reports
- Programmed ADO.NET for communication between application and the SQL Server
- Wrote stored procedures to handle data manipulations using T-SQL
- Wrote unit test cases and performed unit testing

### **Software Developer**

**RS Software** *Nov 2014 - Mar 2019*

- Provided application development, solution and enterprise design for key enterprise projects in Tax Pro GST divisions:
