

PROFESSIONAL OBJECTIVE:

To work in a professional and challenging environment, while best utilizing my talent and keeping abreast with the latest technical advancement in the field of Oracle DBA/ExaCC/PostgreSQL by which I can derive utmost job satisfaction and knowledge of the field and to become a successful in Oracle DBA and ExaCC and PostgreSQL and AWS RDS activities.

PROFESSIONAL SUMMARY:

- Extensive Knowledge on Oracle Architecture, ExaCC (Gen1 and Gen2)
- Extensive knowledge on OCI ExaCC console.
- Planning for and patching Exadata/ExaCC components like DomU and Compute nodes.
- Familiar with Dbascli, Patchmgr and Dbasapi utilities.
- Involved in patching activities such as Exadata Infrastructure maintenance, Dom0 Patching and Security.
- Familiar with VM Cluster Network and VM Cluster.
- Have good understanding of Exadata features like Smart scan, Flash Cache, Storage Index, HCC, PMEM
- Having Knowledge in with Oracle RAC databases.
- Experience in handling production database support and maintenance.
- Configured and maintaining RMAN to take backup of the Oracle databases
- Experience in creating databases using Dbasapi and DBCA utilities.
- Managing and monitoring the Indexes for better performance.
- Involved in Performance Tuning
- Expertise in installing different versions of Oracle (11g, 12c and 19c).
- Experience in Flashback a Database
- Service Management & TAF policy in RAC
- Gap Resolution in Data Guard environment.

EDUCATIONAL QUALIFICATION:

- I had graduated B. Tech from JNTU in ALET, Hyderabad

PROFESSIONAL EXPERIENCE:

- Working as an Oracle DBA in **Prodapt Solutions Pvt Ltd**, Hyderabad from Mar 2023 to Present.
- Worked as an Oracle DBA in **Conduent Business Services India LLP**, Hyderabad from Nov 2017 to Jan 2023.
- Worked as an Oracle DBA in **Tech Mahindra**, Bangalore from Jan-2017 to Aug-2017.

TECHNICAL SKILLS:

Operating Systems	RHEL , OEL
Ticketing Tools	JIRA ,SERVICE NOW
Oracle/PostgreSQL Utilities	DBCA, Dbascli, OEM, Dbasapi, Patchmgr, RMAN, PSQL, PG_DUMP, PG_DUMPALL
Databases	ORACLE Database, EXADATA and ExaCC, PostgreSQL, MSSQL

PROFESSIONAL PROFILE:**# PROJECT3:**

Client	Liberty Latin America and Verizon
Role	Oracle DBA/ PostgreSQL
Duration	FROM Mar 2023 - Present
Environment	Database: ORACLE/ PostgreSQL O/s : OEL,RHEL Cloud : AWS RDS

Roles & Responsibilities:

- Manage and maintain large-scale Oracle/PostgreSQL databases
- Perform Regular backups, Patching and upgrades
- Troubleshoot and resolve complex database issues
- Implement performance tuning and optimization Techniques
- Collaborate with development teams to ensure database design and development best practices
- Involved in database restore and recovery.
- PostgreSQL Database design and Development
- Backup and Recovery (pg_dump, pg_restore, pg_dumpall, pg_basebackup)
- Implemented data transformation and mapping using Golden Gate
- Administered and maintained golden gate environments for data replication and integration
- Administered and maintained AWS RDS databases like Oracle, PostgreSQL
- Migrated databases from On-premises to AWS RDS
- Resolving user's day-to-day issues.
- Experience in working with GGSCI and PSQL commands to manage Exadata storage
- Performed Database Cloning and refresh on to Test environment
- Configured high availability services for Transparent Application Failover(TAF)
- Performed Index Rebuilding to enhance the performance

PROJECT2:

Client	Transport Solution Group
Role	Oracle DBA
Duration	FROM Nov 2017 - Jan 2023
Environment	Database: ORACLE 10g , 11g and 12c and 19c O/s : OEL, RHEL

Roles & Responsibilities:

- Interacting with client and team to resolve queries
- Involved in SQL query tuning.
- Involved in database restore and recovery.
- Involved in table merging activity.
- Resolving user's day-to-day issues.
- Extensive knowledge on OCI ExaCC console.
- Planning for and patching Exadata/ExaCC components like DomU and Compute nodes and IB Switches and Storage servers.
- Familiar with Dbascli, Patchmgr and Dbasapi utilities.
- Involved in patching activities such as Exadata Infrastructure maintenance, Dom0 Patching and Security.
- Familiar with VM Cluster Network and VM Cluster.
- Have good understanding of Exadata features like Smart scan, Flash Cache, Storage Index, HCC, PMEM
- Performed Database Cloning and refresh on to Test environment
- Configured high availability services for Transparent Application Failover(TAF)
- Performed Index Rebuilding to enhance the performance
- Configured DR site
- Installed and configured 11gr2 RAC using SCAN name and SCAN IP's

Project: 1

Client	NEC Corporation
Role	Oracle DBA
Duration	FROM Jan 2017 - Aug-2017
Environment	Database : ORACLE 10g, 11g and 12c O/s: RHEL, OEL

Roles & Responsibilities:

- Resolving user's day-to-day issues.
- Resolving the tickets.
- RMAN Backup validations, which was scheduled to crontab.
- Involved in designing the Backup Strategy Plan.
- Generating AWR Report for database performance Health Check.

- Monitoring the ASM Disk Groups.
- Applied database patches.
- Distribution of Table spaces among different Disks and creation of Database objects.
- Performed Database Cloning and refresh on to Test environment
- Installed & configured 2-Node RAC using OCFS as cluster file system and ASMlib.
- Performed Index Rebuilding to enhance the performance
