

Name : Geethaanjali      PL/SQL Developer  
Gmail : Geethaanjali5717@gmail.com

Contact:8099382382

*To secure a challenging position in an organization where one can effectively contribute skills as software professional.*

#### Professional Overview

- Having Around 9 plus years of experience in the field of **software design, development of Client Server applications** as a PL/SQL Developer/Programmer.
- Application development with all stages of System Development Life Cycle (SDLC): **design, analysis, coding, testing, debugging and providing solutions.**
- Around 9 plus years of experience working with **Oracle 10g/11g/12c/19c** including **PL/SQL programming.**
- Feasibility study, **planning, implementation, testing, deployment** and close-out
- Solid experience in translating business requirements into creation of **Database Objects.**
- Strong Exposure in writing Simple and **Complex SQLs, PL/SQL Functions and Procedures, Packages** and creation of Oracle Objects - **Tables, Materialized views, Triggers, Synonyms, Nested Tables and Collections, Sequence, Views, UTL\_FILE.**
- Interacted with the business users, collected the requirements, analyze the requirements, design and recommend solutions.
- Extensive experience on using SQL, PL/SQL, ORACLE Database, and many other ORACLE facilities, such as **Import/Export, SQL\*Loader.**
- Proficient in writing **complex SQL Queries, stored procedures, Constrains, creating Indexes, Functions, Triggers, Joins and set operators, Sub Queries** Proficient in tuning queries used in the application.
- Highly skilled in **Performance tuning** - analyzing query plans and query tuning using the tools such as **EXPLAIN PLAN** and use hints wherever required. Experience in advanced PL/SQL concepts like **Bulk collect and FORALL.**
- perform the root cause analysis on failures. Resolve the performance related issues and queries.
- Expertise in **Dynamic SQL, Records, Cursors, Exception handling and Ref Cursor .**
- Significant experience working with clients, technical teams for executing concurrent multi-technology projects.
- Strong hands skills in SQL, PL/SQL, Packages/Procedures, Reports, BI Publisher and Workflows.
- Expertise in APIs, Loader scripts, Interfaces, Conversions Comprehensive experience in Oracle Application.
- Good knowledge on Finance Modules process flows.

- Worked in EBS Production support (Incidents, Enhancements and Problem Tickets management) adhering to critical SLAs with good debugging skills.
- Possess excellent oral / written communication and interpersonal skills.
- Strong problem solving & technical skills coupled with confident decision making for enabling effective solutions.
- Significant experience in 24/7 Production Environment Support.
- I have experience on migration project, data integration.

#### **Occupational Contour**

- Since Jul'2023 to Jan 2024 with Xebia It architects Pvt Ltd as PL/SQL Developer and Payroll is CareerNet Technology Pvt Ltd, Hyderabad.
- Since May'2022 to Apr 2023 with IRIS Software Technology ,Hyderabad as PL/SQL Developer.
- Since Apr'2017 to May '2022 with Flydubai Aviation services ,Hyderabad as PL/SQL Developer.
- Since Apr'2016-Apr'2017 date with Beyontec Zenble Solutions Pvt. Ltd., Chennai as PL/SQL Developer.
- Since Jan'2014 – Aug's 2015 with HSR IT Solutions Pvt. Ltd, Bangalore as PL/SQL Developer.

#### **Academia**

- Master in Computer Applications (MCA) from JNTU, Anantapur, A.P.
- Bachelor of Science (B. Sc) from S K University, Anantapur, A.P.

#### **Technical Purview**

<b>Operating System</b>	: Windows XP/Vista/7, Linux, Windows server 2003/2008/2011, Unix
<b>Languages</b>	: SQL, PL/SQL , SQL SEVER 2008, AXPERT, UNIX, ORACLE APPS, SYBASE, POSTGRESSQL.
<b>Tools</b>	: SQL*Plus, TOAD, SQL Developer, WinSCP & Putty, PGAdmin, JIRA, Github, Bitbucket.
<b>Reports</b>	: Crystal Reports and Oracle Reports, Iviews
<b>Database</b>	: Oracle 9i/10g/11g/12c/19g

#### **Project Experience :**

##### **Project -6**

**PROJECT TITLE** : BM (Beneficiary Module).

**Project CLIENT** : Axis Bank

**Company** : Xebia It architects Pvt Ltd.

**ENVIRONMENT** : Oracle 19c, SQL\*Plus, SQL Developer.

**ROLE** : ORACLE PL/SQL Developer.

**DESCRIPTION** : Adding a beneficiary to your bank account is an essential step for seamless financial transaction. It enables you to transfer funds quickly and securely. Whether you're paying someone, sending money to family or

conducting business transactions, knowing how to add a beneficiary to your bank account saves you time and hassle.

A beneficiary is an individual or entity who can receive funds from your bank account. By adding a beneficiary ,you streamline the process of transferring money, making transactions more efficient and secure. This is particularly useful for recurring payments, such as rent /utilities, or sending money to family members.

#### **RESPONSIBILITIES:**

- Developed PL/SQL **Packages, Procedures** and **Functions** accordance with Business Requirements for loading data into different database schema tables.
- Designing **Tables, Constraints, Views, and Indexes etc.** in coordination with the application development team.
- Troubleshooted performance issues and bugs within **packages,procudures** ,Coordinate with the front end design team to provide them with the necessary stored package and procedures and necessary insight into the data.
- Created **indexes** on the tables for faster retrieval of the data to enhance database **performance**.
- Performed **SQL and PL/SQL tuning** and Application tuning using various tools like **EXPLAIN PLAN**.
- Used **Bulk Collections** for **better performance** and easy retrieval of data, by reducing context switchingbetween SQL and PL/SQL engines.
- Created **PL/SQL scripts** to extract the data from the operational database and package and Good Experience on **DML, DDL, DCL, TCL** and **Set Operators**.
- Creation of database objects like **tables, views, materialized views, procedures and packages** using oracle tools like **SQL Developer** and Good Experience in writing **Collections, Cursors, Exception handlingand Ref Cursor**.
- Handled errors using **Exception Handling** extensively for the ease of debugging and displaying the errormessages in the application.
- Communicate issues and progress to project manager.
- Involved in all phases of the SDLC for Designing & giving recommended approach to satisfyrequirements.
- Resolving the issues on priority basis.
- Responsible for **Analyzing** and **Implementing** the **Change Requests** in JIRA.
- I have involved in code deployment as per process.

#### **Project -5**

**PROJECT TITLE** : Incontrol MA.

**CLIENT** : CITI

**Company** : IRIS Software Technology

**ENVIRONMENT** : Oracle 11g, SQL\*Plus, SQL Developer and Oracle Apps, Oracle Reports.

**ROLE** : **ORACLE PI/SQL Developer**.

**DESCRIPTION :** As per mandatory leave policy for CITI employees, the employees posted in sensitive areas in banks are required to compulsory avail leave of about 10 days in a single spell every year. The treasury, currency chests, risk modeling, model validation etc., are considered as sensitive positions or areas of operations which are covered under a 'Mandatory Leave' policy.

It can be combination of vacation time, floating holidays, sick leave, etc. A policy regarding consecutive days of absence is part of a bank's internal control program. CITI shall ensure that the employees, while on 'mandatory leave', do not have access to any physical or virtual resources related to their work responsibilities, with the exception of internal/ corporate email which is usually available to all employees for general purposes.

**RESPONSIBILITIES:**

- Developed PL/SQL **Packages, Procedures and Functions** accordance with Business Requirements for loading data into database tables.
- Involved in Unit Testing **Stored Procedures and Functions**.
- Worked on Reports using SQL and PL/SQL.
- Troubleshooted performance issues and bugs within **packages**, Coordinate with the front end design team to provide them with the necessary stored package and procedures and necessary insight into the data.
- Involved in all phases of the SDLC for Designing & giving recommended approach to satisfy the requirements.
- Created UTL\_FILE scripts to load data into the temporary staging tables.
- Designing **Tables, Constraints, Views, and Indexes etc.** in coordination with the application development team.
- Resolving the issues on priority basis.
- Responsible for **Analyzing and Implementing the Change Requests** in JIRA.
- I have involved in code deployment as per process.

**PROJECT-4**

**PROJECT TITLE** : **PSS** (Passenger Service System )

**CLIENT** : **Flydubai**

**ENVIRONMENT** : **Oracle 11g, SQL\*Plus, SQL Developer and Oracle Apps, Oracle Reports.**

**ROLE** : **ORACLE PL/SQL Developer.**

**DESCRIPTION** : Passenger Service System is a reservation system used by Flydubai. Which mainly focuses on airline passenger reservation and flight inventory. PSS interacts with the AIMS which is responsible for flight schedule. PSS also holds the crew and non crew information as well. PSS has all passenger PNR

details. PSS information is used by Departure control system for passenger boarding and checkin. Once the flight departed, the same information is updated in PSS also.

PSS has different modules such as Flight booking, Flight Inventory, Billing and Settlement Plan (BSP), Special servicerequest, Agents creation, Station Operations: Flight delays.

#### **RESPONSIBILITIES:**

- Coordinated with the front end design team to provide them with the necessary stored procedures and packages and the necessary insight into the data.
- Involved in the continuous enhancements of business needs.
- Developed **PL/SQL triggers** and **master tables** for automatic alters.
- Created PL/SQL **stored procedures, functions and packages** for moving the data from staging area to datamart.
- Created scripts to create **new tables, views, queries and Dynamic SQL** for new enhancement in the application using SQL Developer.
- Created **indexes** on the tables for faster retrieval of the data to enhance database **performance**.
- Performed **SQL and PL/SQL tuning** and Application tuning using various tools like **EXPLAIN PLAN**.
- Used **Bulk Collections** for **better performance** and easy retrieval of data, by reducing context switching between SQL and PL/SQL engines.
- Created **PL/SQL scripts** to extract the data from the operational database and package and GoodExperience on **DML, DDL, DCL, TCL** and **Set Operators**.
- Created UTL\_FILE scripts to load data into the temporary staging tables.
- Creation of database objects like **tables, views, materialized views, procedures and packages** using oracle tools like **SQL Developer** and Good Experience in writing **Collections, Cursors, Exception handling and Ref Cursor**.
- Handled errors using **Exception Handling** extensively for the ease of debugging and displaying the error messages in the application.
- Worked on Reports, BI Publisher and Workflows.
- Work closely with Oracle support and raise service request as and when required for business critical issues.
- Involve in post implementation support to provide solution for production issues or for any other maintenance activities which might also involve change management process.
- Test and document all code changes. This includes Unit Testing, component integration testing, system integration testing, and performance testing, capacity testing and quality reviews.

#### **PROJECT-3**

**PROJECT TITLE** : Windhaven Insurance  
**CLIENT** : Texas and Florida (Windhaven Insurance pvt Ltd.)  
**ENVIRONMENT** : Oracle 11g, SQL\*Plus, SQL Developer.  
**ROLE** : ORACLE PL/Sql Developer

**DESCRIPTION** : Insurance is a contract between, the insurer or the insurance company. Insurer seeking insurance, Where by the insurer agrees to hedge the risk of the insured against some specified future events or losses, in return for a regular payment from the insured as premium. Insurance policy helps within policy period any damages on risk or property then only collected the loss. Windhaven insurance company line of business is vehicle.

Insurance Company before giving policy, collected information about insurer from agent or broker, Insurance Company employee. Here modules are underwriting, billing, claims, Transaction between risk detail's, payment, billing and endorsement and claims, Notes/Diaries.

**RESPONSIBILITIES:**

- Optimized lot of SQL statements and PL/SQL blocks by analyzing the execute plans of **SQL statement** and created and modified **SQL queries, stored procedures for performance improvement.**
- Developed various backend application programs, such as **Views, Functions, Triggers, Procedures** and Packages using SQL and PL/SQL language for the top management for decision making. Implemented all modules logic by using **Triggers and Integrity Constraints.**
- Good understanding of database objects and ability to triage issues.
- Involved in PL/SQL code review and modification for the **development of new requirements.**
- Designed/developed/Modified **tables, views, materialized view, stored procedures, packages and functions.**

**PROJECT-2**

**PROJECT TITLE** : E-Data Capture  
**CLIENT** : Manipal Ecron Acunova  
**COMPANY** : HSR IT Solutions Pvt. Ltd, Bangalore  
**ENVIRONMENT** : Oracle 11g, SQL\*Plus, Toad.

**DESCRIPTION** : The sponsor of the clinical trial develops the CRF to collect the specific data they need in order to their hypotheses or answer their research questions. The size of a CRF can range from a handwritten one- time 'snapshot' of a patient's physical condition to hundreds of pages of electronically captured data obtained over a period of weeks or months.

EDC solutions allow for better data quality, adaptive clinical trials, and reduced time to database lock. A solid EDC solution should allow you to collect, clean, review, verify, and approve clinical trial data in an easy, efficient, and safe manner. The objective is to increase overall productivity and improve the quality and integrity of the data.

**RESPONSIBILITIES:**

- Used Oracle PL/SQL for implementing business rules and do performance tuning procedures.
- Created data mapping files for the data coming from different web services.
- Coded **PL-SQL packages and procedures** to perform data loading, **error handling and logging**.
- Developed procedures using **Dynamic SQL**.
- Worked for designing Logical and Physical data models for Master Data and Transactional Data.
- knowledge and experience in structured systems analysis and design techniques.
- Developed database objects including **tables, clusters, Indexes, views, sequences, packages, triggers** and procedures to troubleshoot any database problems.

**PROJECT-1**

**PROJECT TITLE** : Logistics Management System  
**CLIENT** : Unity Logistics  
**COMPANY** : HSR IT Solutions Pvt. Ltd, Bangalore  
**ENVIRONMENT** : Oracle 10g, SQL\*Plus, TOAD  
**ROLE** : PL/Sql Developer

**DESCRIPTION :**

Unity Logistics is basically managing and controlling the flow or supply of goods or other resources from one location to destination to meet the demands of a customer or the requirement of one department or section of the organization. This project consists of 3 modules admin, freight module and finance module. The admin consists of master details. The freight modules include indent transaction which maintains the loading and unloading point for the customer. GDN transaction attaches the different indent to the each GDN. It maintains two GDN transactions one for market vehicle and one for their own vehicle. LR transaction is attaching different lorry receipt for each GDN. Vehicle Departure includes the departure of GDN. And the project also includes the transactions for LR and GDN arrivals and invoicing the GDN against customer.

**RESPONSIBILITIES:**

- Installation, Creation and support of Oracle 11g database environments.
- Involved in the maintenance and enhancement of the application.
- Maintaining Logical and Physical structure of the database.
- Creating **tables, views, scripts for automatic operations** of the database activities. Coded various **cursors, stored procedures, packages and triggers** to incorporate business logic into the application.

- Used the technical document to **design the database tables**.
- Designed/developed **tables, views, various SQL queries, stored procedures, functions**.
- Monitor database and system backups, developed Oracle **Stored procedures, functions, packages, and triggers** that pull data for reports.
- Developed complex SQL queries for data retrieval from various database objects including **tables and views**.

#### **Personal Vitae**

Linguistic Abilities : English, Kannada & Telugu

**Place:**

**(Geetha)**

**Date:**
