Skills

Skills:

- Key Technical Skills:

  - Programming Languages: C, Python

  - Familiarity with Cyber Security, Robotic Process Automation, Cloud, and Data Engineering.

- Soft Skills:

  - Good communication skills, listening skills, punctuality, adaptability.

- Relevant Skills for the Position:

  - Scripting (Python), exposure to cloud technologies, and experience in automation through internships.

Candidate Stability

Candidate Stability:

- Red Flags:

  - No significant red flags noted, but the candidate is still in the early stages of their career with

limited professional experience.

Recommendation

Recommendation:

- Overall Assessment: Potential Match

- Justification: The candidate has relevant internships and skills but lacks direct experience in DevOps roles and specific tools mentioned in the job description.

- Shortlisted for the next round.

- Gaps in Technical Skills: Direct experience with CI/CD pipelines, container orchestration (Docker, Kubernetes), and specific cloud platform experience (AWS, Azure, GCP) is lacking.
