CAREER SUMMARY

Possess around 11.10+ years of experience in Software Industry that involved development and management of software applications/products including design, development, testing, defect fixing and integration in Java/J2EE Projects. Extensive experience in Client/Server Development and Architect using IBM MDM, J2se, j2ee, Spring, XML, DB2 and Oracle on Windows. Recently learned on Alation, Azure Data Factory and Databricks basics.

Hands on Experience in IBM RAD, Eclipse (IDE), WebSphere, Apache Tomcat application server.

Good exposure on Core Java, JDBC and Spring basics.

Good exposure on IBM DB2 and Oracle 10g with respective of IBM MDM.

Total Experience includes around 9.3 years in Master Data Management (MDM) Technology (includes MDM10 and MDM11.4 and MDM11.6).

Experience in implementing Extensions, Additions and Composite Transactions in MDM.

Experience in implementing MDM product features like notifications, external rules, external validations, suspect duplicate processing and Search Framework.

Detailed understanding of IBM-MDM Data Model and transactions.

Total Experience in IBM and Accenture on Banking Domain

Very good exposure on SDLC, Sprints and Cross squad.

Identified and performed the units testing to achieve zero defects code delivery.

TECHNICAL SKILLS

Platform: Windows

Database: IBM DB2 and Oracle12c

Tools: IBM MDM10, MDM11.4 and MDM11.6

Programming: Java, SQL

Application Tools: MS-Word, MS Excel etc.

Monitoring Tools: AppDynamics, Splunk, Dynatrace

Unix Testing Tools: Finesse, SOAP

Deployment : IBM RTC, Harvest

ACADEMIC QUALIFICATION

Master of Computer Applications in Regency institute of technology from Pondicherry University, Yanam 2011.

CERTIFICATIONS

AWS Certified Solutions Architect Associate - completed on 29-December-2021 and expiring on 29-December- 2024.

Azure Data Engineer Associate - completed on 24-March-2023 and expired on 24-March-2024.

PROJECT SUMMARY

Project Name

Project1

Duration

Feb. 2019 to Aug-2024.

Role

Data Eng, Mgmt & Governance Assoc Mgr

Tools

IBM MDM 11.6, Oracle12c, IBM RAD, UNIX, SOAP, WebSphere Application Server 8.5, XML, IBM RTC and UDC, Jira.

Description

Implemented and enhanced IBM MDM to generate golden customer data

Responsibilities

Involved in development/enhancement of services for the sub projects under releases

Involved in customized existing OOTB services.

Involved in designing, architect and development of new extensions and validation rules

Developed customized transactions as Composite transactions using MDM framework.

Involved in Onshore team meetings for requirement gathering

Preparation of TDD's, enhancement request documents for all the services that we developed in.

Involved in developing test cases and test suites using Fitness Tool.

Prepared class diagrams and sequence diagrams.
